Don't miss the first trainings opportunity in 2021

In January is our first PLA training opportunity in 2021. Our virtual trainings - your benefits

// Develop new skills - The PLA 3.0 Super User Training focuses mainly on the workflow aspects and basic analysis tasks. In addition, the subsequent PLA 3.0 Advanced Analysis Workshop for Biological Assays reveals much more in-depth details. We offer both for a small group. This setting allows us to customize the training and workshop agenda to the individual requirements of the participants and to answer your specific questions.

// Participate from home during office hours - Our virtual trainings are offered for all three major world regions. The timings of the classes will allow participation within your office hours.

- Asia, Australia, Oceania
- The Americas
- Europe, Middle East, Africa

// Networking and exchange of knowledge - You don't have to travel to meet new people and exchange experience and knowledge. Our virtual business classes are the perfect place for professional discussions.

PLA 3.0 Super User Training & PLA 3.0 Advanced Analysis Workshop by regions
