### [The company behind PLA 3.0](#)

Dear Max,

You certainly know one or the other about PLA 3.0. But what do you know about the company behind PLA 3.0 and the people working for Stegmann Systems? I want to take this opportunity and tell you more about us.

For more than 25 years, we have been developing database software solutions at our location in Rodgau, Germany. Rodgau is located near Frankfurt am Main, one of the most diverse places in Germany and one of the world's leading financial centers. A lot of well-known pharmaceutical companies, museums, and memorials are located in and around Frankfurt.

Why am I talking about museums? Because our 50 employees do not just work on PLA 3.0, our portfolio also includes the APS software.

APS supports organizations in crosslinking, publishing, and organizing numerous data collections and is often used by leading archives, museums, and scientific institutions. Would you like to know more about APS? [Yes! \(please click\)](#)

Our other product, PLA 3.0, is a biostatistical software used by every top 100 pharmaceutical and biotech company worldwide. The current version, PLA 3.0.6, set new standards for analyzing and monitoring biological assays.

Would you like to read more about PLA 3.0.6? [Yes! \(please click\)](#)

Best regards  
Mathias von Gellhorn  
Marketing Manager
